

The smart solution for your business continuity needs

In today's knowledge economy, protecting your critical data is a business imperative. Having a reliable solution in place that mitigates the risk of data loss and ensures a smooth path to recovery is essential to the continued functioning of key areas of your business.

*Designed by DBAs
for DBAs*

*Simple to install and
manage*

*Affordable with long
term savings*

*Trusted in over 110
countries*

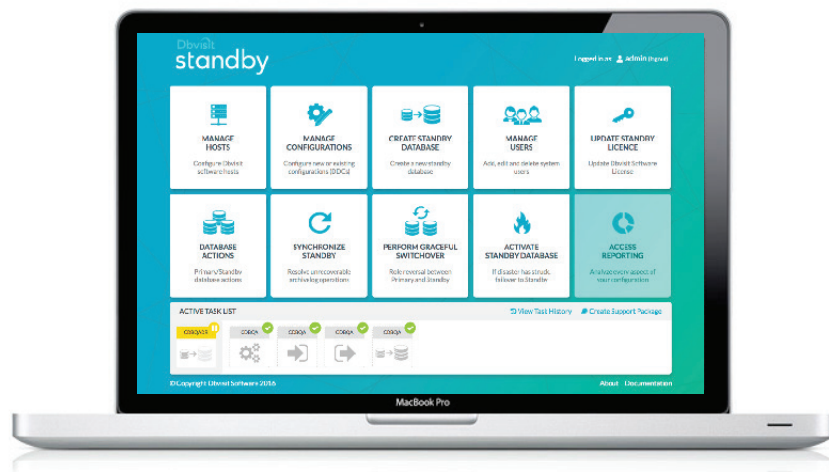

*Standby database for
Standard Edition*

Dbvisit Standby is trusted in over 110 countries to protect Oracle Standard Edition databases against disaster, which includes hardware failures, natural disasters and human error. It helps to protect your critical data infrastructure, whether on-premises, in the cloud or a hybrid configuration. Dbvisit Standby helps you get more from your existing investment in Oracle® Database Standard Edition software - this includes SE, SE1 and SE2.

Simplicity

With both a graphical user interface and access to the command line, **Dbvisit Standby** is very simple to install, configure and administer. It assists you in creating the standby database and includes all the tools and utilities to effectively and easily manage it. Dbvisit Standby is focused on keeping it simple including:

- Step-by-step guided installation process
- Optional templating function for easy recreation of standby databases
- Customizable creation of the standby database
- Option to script administrative tasks and run in batch mode
- Automatic management of archived log files on the primary and secondary database
- Cloud ready for Oracle, AWS, Microsoft Azure
- Full support for creating standby databases using Oracle Managed Files (OMF), Oracle Automatic Storage Management (ASM) or even RAW device based storage

Peace of mind

Dbvisit Standby is backed by DvisitProtect, providing support services designed to ensure the software continues to operate flawlessly with all Oracle updates and upgrades and new versions of your operating system.

Fully featured

Dbvisit Standby provides features such as failover, graceful switchover, support for Oracle RAC, ASM and OMF, along with a number of advanced features such as compression and encryption for archive log transportation. Dbvisit Standby features include:

- Time-delayed standby database updating
- Recover the standby database past unrecoverable archive log gaps
- Create multiple standby databases from the same primary
- Creating a "cascading" standby database where a secondary standby database is created from an already existing standby database
- Transportable Media support option for creating large databases
- Support for custom pre- and post-processing scripts
- Support for option to recover standby to specific SCN or Timestamp
- Support for creating an Oracle RAC enabled standby database
- Central Console from where multiple primary/standby configurations can be managed
- Automatic detection of archive log generation followed by transfer of logs without dedicated schedule**
- Automatic detection of archivelog arrival at standby site and starting the application (recovery) procedure**
- Full support for Oracle Database 12c Multitenant in an Oracle Standard Edition 2 (SE2) configuration
- Support for automated batch operations to:
 - Perform a Dbvisit Standby automated installation
 - Create a standby database and standby database templates
 - Synchronize a standby database using RMAN incremental backups

** Linux only - planned for Windows shortly

Secure

- In the event of a failure, **Dbvisit Standby** ensures applications switch over to the standby database in a matter of minutes, saving you the inconvenience of dealing with restoration delays, undue pressure on other systems and hardware unavailability. Every database change is replicated to the standby database and security is at the core of Dbvisit Standby's design.
- Secure encrypted communication between all **Dbvisit Standby** components

Technical specifications

ORACLE DATABASES*	8i to 12c (32 & 64 bit versions)
ORACLE EDITIONS	Oracle Enterprise Edition Oracle Standard Edition (SE, SE1 and SE2) Oracle Express
STORAGE	ASM file systems
OPERATING SYSTEMS*	Microsoft: Windows 2003 and above Linux: Intel & AMD (32 & 64bit) Unix: AIX, Solaris

* Dbvisit Standby Version 8 only supports Oracle 11.2 and above, Windows 2008 (64bit) and above, Linux (64bit)
